Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

"on/off condensing unit") and is mounted in a compartment (36) that is separate from the storage compartment, and a fan (46) for circulating air between the storage compartment and the compartment (36) containing the evaporator (45). The no-frost refrigerator comprises a control circuit (57, 61) which, when the evaporator (45) is switched on, makes the average speed of the fan (46) variable according to a measured air humidity level (column 6, lines 63 to 69 - "... a rise in humidity above the settings of humidostat 57, causes humidostat 57 to make the upward contact shown to energize relay coil 56 through wire 112. Relay 56 then closes to establish a circuit through variable transformer 58 to fan motor 47 to run it at a reduced speed in accordance with the setting of the transformer").

2. Independent claim 10

The argumentation presented in point 1 above also applies to independent claim 10. The subject matter of claim 10 therefore lacks novelty (PCT Article 33(2)).

Document D1 discloses (the references in parentheses are to D1; see figures 3 to 7) a method for operating a no-frost refrigerator as defined in claim 1, involving the following steps:

- (a) estimating a humidity level in the storage compartment (by means of humidostat 57);
- (b) choosing a circulation speed for the fan (46) according to the estimated humidity level (see D1, column 6, lines 63 to 69);
- (c) running the fan (46) at the chosen circulation speed.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/006256

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

3. Dependent claims 2, 3, 5-7, 9 and 11

Dependent claims 2, 3, 5 to 7, 9 and 11 do not contain any features that meet the PCT requirements in respect of novelty or inventive step when combined with the features of any of the back-referenced claims (see documents D1 to D6 and the passages cited in the international search report).

4. Dependent claims 4 and 8

The combinations of features contained in dependent claims 4 and 8 are neither known from nor suggested by the prior art.
